Summary

I am a skilled Full Stack Web Developer with expertise in the MERN stack, focusing on delivering user-centered solutions. I have successfully completed diverse projects, tailoring them to various audiences. My strengths include building interactive UIs with React, developing robust APIs with Node.js and managing secure databases using MongoDB and PostgreSQL. As a collaborative team player, I excel in cross-functional teamwork and version control. Continuously staying informed about industry trends, I am committed to delivering innovative and efficient solutions.

Work Experience

Full Stack Developer Jan 2023 - Dec 2024
ATI Limited, Dhaka, Bangladesh

- **Led and mentored a team of 7 MERN stack developers,** while fostering continuous learning and adoption of cutting-edge development practices.
- **Designed and developed official websites** for a leading pharmaceutical company and a bio-research center, enhancing their digital presence and accessibility.
- Served as the **primary spokesperson and lead developer** for a government-funded project
- **Modernized multiple in-house legacy applications** (oracle forms based) by migrating to the **MERN stack**, improving system performance, maintainability and user experience.

Junior Frontend Developer Jun 2022 - Dec 2022
ATI Limited, Dhaka, Bangladesh

- Collaborated with senior developers to implement **user-friendly features and reusable components**, enhancing code maintainability
- Contributed to debugging and optimization, **reducing front-end issues and improving load times.**
